

Generate Cash Flow Every Month

With financing solutions from Graybar Financial Services, your lighting retrofit project can provide positive cash flow every month.* Customers are amazed how fast the savings add up.

Answer "Yes" to any of these questions and you may benefit from a lighting upgrade:

1. Are you interested in knowing what it's really costing you to light your facility?
2. Would you like to reduce energy costs and simultaneously increase the light quality of your workplace?
3. Are you interested in enhancing your building's value with little or no capital expense?
4. Does your facility use High Output, Mercury Vapor, High Pressure Sodium or Metal Halide Lamps?
5. Would your employees or those who lease your building benefit from improved light quality?
6. Are you aware of the many energy incentives available for lighting improvement projects?

*Subject to credit approval. Consult a tax advisor for details related to tax savings, energy rebates and their advantages.

When customers do the math, it's a no brainer...lighting retrofits just make dollars and sense!

Imagine getting paid to enhance your lighting, increase worker safety and improve employee performance. With Graybar Financial Services (GFS), you can finance your lighting retrofit project with the energy savings and apply available rebate dollars and tax incentives toward your monthly revenue stream...or use the cash windfall for another project.

Don't let another month rob you of valuable revenue. With increasing energy costs, can you really afford to wait?

Take advantage of the savings today and preserve your capital for tomorrow.
