POOL SYSTEMS

The Healthy Alternative in Pool Maintenance

**Balancing
& Sanitizing
a Pool
Could Never
Be Easier**

The Ultimate Pool System

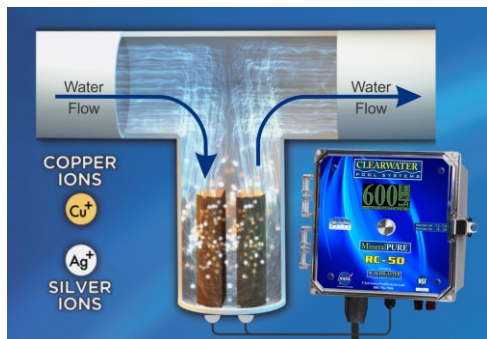

Introducing

CLEARWATER™ POOL SYSTEMS

The Healthy Alternative in Pool Maintenance

MineralPURE®

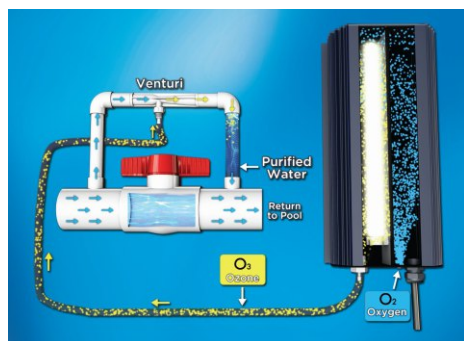

Mineral Ionization

A mineral ionization system that injects safe and natural copper or copper & silver ions into the water to help control algae, bacteria, and viruses. The system alone can cut back on chlorine use up to 90%. In 1989, NASA granted *Clearwater* a license to commercialize from their technology and Buzz Aldrin was our company spokesman. The shown model is NSF and UL approved.

OzoneMAX™

Vacuum-ultraviolet Ozone System

An ultra-violet ozone system compete with a Venturi manifold setup that alone will reduce chlorine use up to 50% or up to 95% when used in conjunction with the **MineralPURE** ionizer. Enjoy crystal clear water. A great oxidizer and effective in controlling cryptosporidium and E. coli.

pH PURE™

CO₂ Injection for pH Control

A new product that keeps the pool balanced around the clock virtually without the need of chemicals - including muriatic acid. Economically and safely used on commercial pools for decades, the system injects CO₂ – carbon dioxide into the pool. It's about 1/5th the cost of using muriatic acid and sodium bicarbonate.

Relax!

Let the **Clearwater Pool System** take care of the pool!

The **Clearwater Pool System** makes pool sanitizing and balancing a breeze. Nobody likes dealing with hazardous chemicals with their skyrocketing prices along with trying to balance the pool. Our system gives you the most advanced, eco-friendly, and healthiest alternative.

There are three components to the **Clearwater Pool System** – available as a package or à la carte.

"I don't know how anyone would ever consider chlorine or salt in their pool when this is so luxurious, clean, healthy and maintenance free. I don't put anything in my pool and the water is just crystal clear"

"We are ecstatic about our Clearwater Pool System. There's nothing on the market like it"
